

BRIDGE

LOCATION

Maribor, Slovenia

PHASE

preliminary design,
competition entry

USE

public;
pedestrian bridge

AUTHOR

Ivo Skelin

YEAR

2010

A bridge is a pathway; the shortest distance between two points; a structure that connects two riverbanks trying to grasp the intangible. But a bridge can also be a place, a meeting point, a space to rest.

Two riverbanks, two paths that meet and go their separate ways, creating two places, one more isolated than the other, open to the river and to themselves.
